

Workout Video Classifier Assignment

You're provided with videos of workouts, grouped by workout type in named folders. The folder name indicates the workout in the video.

Your objective is to design a classifier to identify various types of workouts from a set of videos.

Dataset:

<https://www.kaggle.com/datasets/hasyimabdillah/workoutfitness-video/data>

Deliverables: A Jupyter Notebook with all the code and explanations.

Recommended environment: Kaggle Notebooks or Google Colab - both provide GPUs and make sharing the final .ipynb straightforward.

Due Date: 03.08.26 23:59

Good luck!
